Dear Doctor,

We wish to inform you of expected further product shortages of Vetmedin® (pimobendan) and anticipated difficulties meeting demand in the U.S. market due to a number of factors, including the impact of COVID-19 at the production site. The severity of shortages and timing will vary by presentation and likely will persist for the remainder of the year.

Our focus continues to be the health and well-being of the dogs you care for and we understand how important Vetmedin is for your patients. We will continue to allocate product as our current, limited supply permits while also reducing allocations across some presentation levels.

We are committed to re-establishing a robust supply as quickly as possible. We are urgently pursuing a number of actions to achieve normalized VETMEDIN supply as soon as possible while also adhering to all local health authority guidelines for manufacturing operations.

Thank you for your continued patience as we manage through a difficult situation. We remain steadfast in our commitment to serve our customers and their patients.

As always, we invite you to contact your Boehringer Ingelheim representative or the Boehringer Ingelheim Veterinary Technical Solutions team at 1-888-637-4251 with your questions.

Sincerely,

Randolph Legg
Head of U.S. Boehringer Ingelheim Animal Health
